

Project Summary

Rocky Mountains Cooperative Ecosystem Studies Unit

Project Title: Prairie Stream Inventory

Type of Project: Technical Assistance

Project Discipline: Natural

Funding Agency: Bureau of Land Management

Other Partners/Cooperators: Montana State University

Effective Dates: 7/1/2014- 6/30/2019

Funds: \$172,500

Investigators and Agency Representative:

Agency Contact: Jake Chaffin, Montana State Office, 5001 Southgate Drive, Billings, MT 59101; 406-896-5034; jchaffin@blm.gov

Investigator: Robert Bramblett, Montana State University; 406-994-4433; bbram@montana.edu

Project Abstract: Monitoring prairie streams will give managers a better understanding of hundreds of miles of prairie stream habitat and fish populations and communities through time. This will also give valuable insight into how the fish and their habitat respond to natural and/or management changes. The ability to respond to various land management actions will allow land managers to understand how various fish species respond to habitat disturbance.

Outcomes with completion dates: 6/30/2019

Keywords: prairie streams, monitoring, Bureau of Land Management, Montana State University
