

Rocky Mountains Cooperative Ecosystem Studies Unit
Project Summary

Project Title: Biological Control of Invasive Plants Impacting BLM Managed Lands

Type of Project: Research

Project Discipline: Natural

Funding Agency: Bureau of Land Management

Other Partners/Cooperators: Montana State University

Effective Dates: 6/12/2015 – 6/11/2020

Funding Amount: \$60,000

Investigators and Agency Representative:

Agency Contact: Floyd Thompson, Montana State Office, 5001 Southgate Drive, Billings, MT 59101; 406-896-5025; fthomps@blm.gov

Investigator: Jeffrey L. Littlefield, Land Resource and Environmental Sciences , Montana State University, Bozeman, MT 59717; Phone: (406) 994-4722; e-mail: jeffreyl@montana.edu

Project Abstract: The purpose of this program is to continue research on biological weed control agents (plant pathogens) that will help to slow or prevent the infestation of invasive and noxious plant species. This program will expand management and control of invasive plant species. Effective and efficient management and control of invasive species will protect the natural resources of forest and rangelands.
