

Project Summary
Rocky Mountains Cooperative Ecosystem Studies Unit

Project Title: Integrated Information Management System
Type of Project: Technical Assistance
Project Discipline : Natural
Funding Agency: BOR
Other Partners/Cooperators:
Effective Dates: January 1, 2007 – December 31, 2009
Funding Amount: \$323,235.00
Investigators and Agency Representative (contact information): PI: David K. Stevens Professor of Civil and Environmental Engineering E-Mail: David.Stevens@usu.edu Phone: (435)797-3229 Fax: (435)797-1185 Utah State University 4110 Old Main Hill Logan, Utah 84322-4110
Project Abstract: The IIMS solution will be implemented over three years, phased in as a series of fully functional modules. This highly modular architecture and delivery approach will make the IIMS easier to manage and control financially. This provides three key benefits: 1) it delivers the most needed decision making tools to water managers as soon as possible; 2) it minimizes the risk of failure and avoids the pitfalls that commonly undermine large-scale technology projects; 3) it keeps the project responsive to the changing needs of the end users throughout the development period.
Outcomes with completion dates (reports, publications, workshops, videos, etc.):
