Project Abstract: The purpose of this task agreement is to obtain technical assistance for help completing revisions and updates to the Greater Yellowstone Network Water Quality Standard Operating Procedures in order to include water quality parameters intended to be monitored as part of the Integrated Water Quality Monitoring Plan. The cooperator will provide technical assistance by helping the network define water quality parameters, identify preferred analytical methods (including detection limits), develop field methods and establish quality assurance/quality procedures.

Outcomes with Completion Dates: Master list of Water Quality parameters with method and detection limits specified; summary definitions for each parameter that defines what it is and why it is important; field collection Standard Operating Procedures for parameters defined in products 1 and 2; Quality Assurance/Quality Control Standard Operating Procedures for Parameters defined in products 1 and 2. Due by 9/30/2007
