

Project Summary
Rocky Mountains Cooperative Ecosystem Studies Unit

Project Title: Air Quality and Nitrogen Deposition in the Rocky Mountain and Bakken Formation Regions

Discipline: Natural
Type of Project: Technical Assistance
Funding Agency: National Park Service
Other Partners/Cooperators: Colorado State University
Effective Dates: 8/10/2013 - 8/31/2015
Funding Amount: \$743,897 [FY14: \$318,398; FY14: \$425,499]

Investigators and Agency Representative:

NPS Contact: Bret Schichtel, National Park Service, Air Resources Division, c/o Colorado State University, 1375 Campus Delivery, Fort Collins, CO 80523 Tel: (970) 491-8581; bret_schichtel@nps.gov

Investigator: Jeffrey Collett, Jr., Atmospheric Science Department, Colorado State University, Fort Collins, CO 80523; Tel: (970)-491-8697; Fax: (970)-491-8449; e-mail: Collett@lamar.colostate.edu

Project Abstract: The goal of the project is to improve our understanding of the sources, transport, atmospheric transformation, deposition, and impact of air pollutants in the US National Parks. The project efforts are designed to complement measurements from routine monitoring networks (e.g. Interagency Monitoring of Protected Visual Environment (IMPROVE), Ammonia Monitoring (Amon). National Atmospheric Deposition Program (NAPD), Clean Air Status, and Trends Network) to provide more detailed characterization of air quality problems in the particular parks and regions and to identify key gaps associated with current air quality and deposition monitoring strategies.

Outcomes with Completion Dates: August 31, 2015

Keywords: Colorado State University, NPS-Air Resources Division, Rocky Mountain and Bakken Formation Regions, air quality, nitrogen deposition
