Project Summary Rocky Mountains Cooperative Ecosystem Studies Unit

Project Title: Development of Citizen Science programs and materials

Discipline: Interdisciplinary
Type of Project: Technical Assistance
Funding Agency: National Park Service
Cooperators: Colorado State University

Effective Dates: 7/1/2014 - 9/30/2015

Funding Amount: \$9,996

Investigators and Agency Representatives:

NPS ATR: Isabel W. Ashton, Director, Continental Divide Research Learning Center, Rocky Mountain National Park, 1000 US Hwy 36, Estes Park, CO 80517; (970) 586-1302; isabel_ashton@nps.gov

Investigators: Greg Newman, Natural Resource Ecology Laboratory, Colorado State University, Ft. Collins, CO 80523, 970-491-0410, Email: gregory.newman.@colostate.edu/Brett Bruyere, Colorado State University, Fort Collins, CO 80523, 970-491-7690, Email: brett.bruyere@colostate.edu

Project Abstract: Citizen Science is growing at RMNP and requires appropriate development, operations and post-project management to be successful. Recent efforts have been on project by project basis and do not reflect a large systemic approach to long-term monitoring and resource stewardship approaches to public involvement. Public interest and resource stewardship need indicate an increase in citizen science projects over time. The need to develop a sustainable productive long-term citizen science program requires external expertise and technical assistance.

The CSU team under the direction of Greg Newman and Brett Bruyere will assess current and past citizen science efforts at Rocky Mountain National Park. Based on this assessment the CSU team will provide recommendations for future development of a long-term Citizen Science program at the park. This assessment will address current science standards, connection to STEM initiatives and programs, training, safety, protocols and methods, reporting and data management.

Outcomes with Completion Dates:

June, 2015 Final Report Due
