

Project Summary
Rocky Mountains Cooperative Ecosystem Studies Unit

Project Title: Phase I Restoration Monitoring for Lulu City Wetland, Rocky Mountain National Park, Colorado

Discipline: Natural
Type of Project: Technical Assistance
Funding Agency: National Park Service
Cooperators: Colorado State University
Student Involvement: yes
Effective Dates: 5/1/2015 - 12/31/2016
Funding Amount: \$32,008

Investigators and Agency Representatives:

NPS ATR: Scott Esser, Rocky Mountain National Park, Ecologist, 1000 US HWY 36 Estes Park, CO 80517, Scott_Esser@nps.gov, 970-586-1394

Investigators: David Cooper, and Sara Rathburn, Department of Forest, Rangeland and Watershed Stewardship, Colorado State University, Fort Collins, CO 80523, Phone: 970-491-5430; david.cooper@colostate.edu and Phone: 970-491-6956, sara.rathburn@colostate.edu

Project Abstract: This project addresses the need for a detailed restoration plan and expert workshop for the Grand Ditch Restoration effort in Rocky Mountain NP. CSU's work will cover zone 2 (Lulu Creek, including zone 2b, along the ditch breach channel that is tributary to Lulu Creek), zone 3 (Colorado River from just upstream of Lulu Creek to the Lulu City wetland), and zone 4 (Lulu City wetland). CSU investigators will address all issues related to stream channel and floodplain/riparian area restoration.

The restoration plan will include the specifications for final ground surface elevations, cut and fill volumes needed, stream bed design details, and a planting plan. The CSU cooperators will work with ROMO staff to set up an expert workshop to review the restoration plans.

Outcomes with Completion Dates: December 31, 2016

Keywords: restoration, Grand Ditch, Lulu City Wetland, Rocky Mountain National Park, Colorado State University
