Project Summary, including description of project deliverables and major results. If the information is restricted (e.g. location of endangered species or cultural resources), indicate the title and location of the final report.

There were multiple components of this project, none of which produced a final report. The primary work involved preservation of the park's "Historic Motion Picture Film Collection," which involved hand-winding 500 reels of 16mm and 35mm film onto archival cores, then labeling and placement into archival canisters. The remainder of work focused on processing, re-housing and cataloging twenty boxes of the "Resource Management Collection" and reformatting several boxes of the "Craig Bates Collection."
