Project Abstract:

The purpose of this proposal is to process and catalog seven linear feet (11,000 items) of Yosemite Archives. The documents will be preserved and cataloged according to NPS museum standards. These archival resources are comprised of historic correspondence, field notes, photographs, and drawings, dating back to the early 1900's.

Justifications:

Currently, the Yosemite Archives is largely unprocessed and uncataloged. Degradation of original materials will continue until basic preservation such as processing and rehousing is completed. Additionally, access to the archives is extremely limited as materials have not been cataloged. This project will involve processing and cataloging a small (seven linear foot) collection.

Outcomes with Completion Dates:

Process, rehouse and catalog seven linear feet of Yosemite Archives (11,000 items).
