Project Abstract: The objective of this project is to produce a history of resource management in Glacier National Park. This history will function as a key management tool for park management and resource managers, identifying and discussing the development and implementation of policies regarding the management of the park's natural and cultural resources. It will also provide an informed context for contemporary and future decision-making processes.

The preparation of this document requires research and collection of information and materials, organization of materials, synthesis and interpretation of information, and narrative writing.
