Project Abstract:

Fort Laramie National Historic Site is located on the banks of the Laramie River near its confluence with the North Platte in southeastern Wyoming. The purpose of this project is to prepare a publication-ready copy of the Fort Laramie Cultural Landscape Report. A student at Utah State University will travel to the park to work with FOLA staff on the final version of this report.

The Cultural Landscape Report was originally prepared in 2001, and has gone through various edits since that time. While there is an electronic copy of the report, it does not reflect the most recent edited version. The most recent edits were made on a paper copy of the report, largely in the form of margin comments. This project is to prepare a final, publication-ready copy of the report. This project is funded through the cultural specialist, NPS, RM-CESU.

Additional funds were added in August 2005 to allow the researcher to photograph existing conditions at Fort Laramie, and to add research time for locating missing maps and historical photos. The researcher will need additional time to rewrite portions of the Cultural Landscape Report.
