

**Project Summary**  
**Rocky Mountains Cooperative Ecosystem Studies Unit**

<b>Project Title:</b> CULTURAL RESOURCE SURVEY AND EVALUATION OF HISTORIC ROAD FEATURES, VIRGINIA CASCADE, YELLOWSTONE NATIONAL PARK, WYOMING
<b>Type of Project:</b> Technical Assistance
<b>Funding Agency:</b> National Park Service, Yellowstone National Park
<b>Effective Dates:</b> September 1, 2002 - May 30, 2004
<b>Funding Amount:</b> \$13,340
<b>Investigators and Agency Representative:</b> UNIVERSITY: David Eckles, Dir. of Archeological Survey, University of Wyoming, 307-766-5301 NPS CONTACT: Elaine Hale, Yellowstone NP, 307-344-2156
<b>Project Abstract:</b> Inventory and documentation of architectural, landscape, and engineering features associated with the historic road system in Yellowstone National Park. These character defining features include, but are not limited to, stone retaining walls, masonry guardwalls, masonry box culverts and culvert headwalls, stone curbing, steps, and flumes (spillways), log cribbing, log guardrails, bollards, log bracing structures, and bridges.
<b>Outcomes with completion dates:</b> Completed (in draft) Historic Building/Structures Survey Forms will be provided to the Branch of Cultural Resources for review by January 30, 2004. The final forms are due 30 days after receipt of the YNP comments but no later than May 2004.
<b>Keywords:</b> Yellowstone National Park, Virginia Cascade, cultural resources, historic road features, archeology
