

Project Summary
Rocky Mountains Cooperative Ecosystem Studies Unit

Project Title: Predicting Effects of Climate Change on Native Fishes in Northern Great Plains Streams

Discipline: Natural
Type of Project: Research
Funding Agency: USGS
Other Partners/Cooperators: Montana State University
Effective Dates: 9/15/2011 - 9/30/2016
Funding Amount: \$59,421 [FY13: \$23,500; FY12: \$35,921]

Investigators and Agency Representative:

USGS Contact: Robert Gresswell, USGS Northern Rocky Mountain Science Center, 2327 University Way, Suite 2, Bozeman, MT 59715; 406-994-7085; bgresswell@usgs.gov

Investigator: Robert Bramblett, Montana State University, Lewis Hall 301B, Bozeman, MT 59717; 406-994-4433; bbram@montana.edu

Project Abstract: The goal of this research is to link predicted changes in precipitation and air temperature to changes in water quantity in streams, and in turn, fish assemblages.

Outcomes with completions dates: January 1, 2018

Keywords: climate change, native fishes, streams, Northern Great Plains, USGS, Montana State University
