

CORR

COMMUNITY
OUTDOOR
RECREATION
REALIZATION

**A PATHWAY TO REALIZE
YOUR COMMUNITY'S
OUTDOOR RECREATION
POTENTIAL.**

GOAL

To provide guidance to communities throughout Montana to support the planning, vision, and implementation for outdoor recreation.

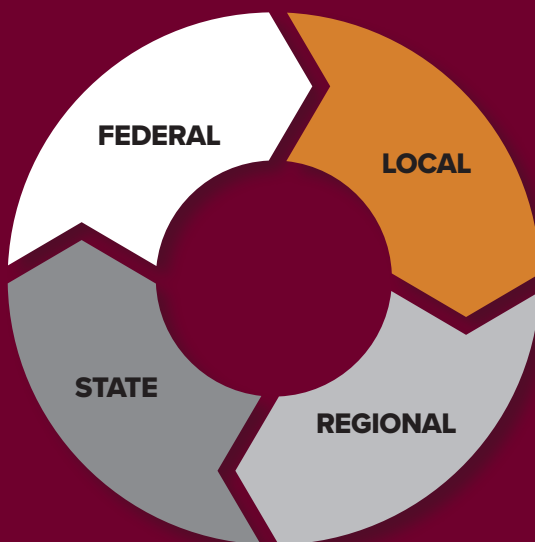

OBJECTIVES

- To enhance community well-being and way of life
- To assist in growth of outdoor recreation economy through the public and private sector

WHO IS CORR FOR?

CORR is for Montana communities seeking to realize their recreation vision. Communities are encouraged to tailor CORR to their specific community needs. The process can and is encouraged to be inclusive of various partners at the local, state, tribal, regional, and federal levels.

CORR is applicable for a wide variety of projects. The spectrum can range from small community-level projects to growing an area's outdoor recreation economy on a large scale. CORR will provide guidance to achieve communities' vision for outdoor recreation.

This is an iterative process and may look different for each community. The steps above will be explained in greater detail within the final plan and question prompts will be included to serve as a starting point.

WHAT'S NEXT?

In collaboration with University of Montana students, several communities were identified as potential pilot communities. The CORR process will be piloted in selected communities over the next year to help further refine and strengthen the process.

The final CORR plan will be a useable “template” that can be catered to fit an individual community and will contain tools to support and assist communities in achieving their goals and overarching vision. Elements of the final CORR plan will include a step-by-step framework, potential solutions to common roadblocks, and resources to aid throughout the process.
