Office Hours: Wednesdays 1:30-3:30 pm or by appointment

**COURSE DESCRIPTION**

Effective communication skills are critical for professionals in wildlife biology. Biologists who excel at verbal communication are better positioned to be selected for jobs, to meaningfully explain the results of research, and to compel others to take actions that benefit wildlife. The goal of this course is to enhance students' oral communication skills through instruction and practice.

**COURSE OBJECTIVES**

- Learn skills to communicate effectively and strategically in various professional settings
- Gain experience giving professional-oriented oral presentations
- Practice self-critique and constructive critique of peers to improve communication skills
- Learn about wildlife biology and conservation topics

**LEARNING OUTCOMES**

*Communicate effectively and strategically.* Students should be able to:

- identify necessary steps in preparing professional seminars and speeches;
- identify techniques for engaging audiences and delivering key messages;
- tailor oral presentations to diverse audiences; and
- understand linkages between oral communication and leadership.

*Gain experience speaking in front of peers.* Students should be able to:

- prepare and deliver oral presentations in front of others;
- appreciate concepts of channeling inner-purpose and nerves into positive energy when preparing and delivering speeches; and
- overcome basic anxieties associated with public speaking.

*Critique presentations.* Students should be able to use their knowledge of public speaking to constructively critique presentations given by themselves and others, in ways that lead to meaningful improvement.

*Expand knowledge of wildlife biology and conservation.* Students should have a broader knowledge of current wildlife science and management issues.

## TEXT BOOK

*The Honest Broker: Making Sense of Science in Policy and Politics*, by Roger A. Pielke, Jr.

Reading assignments will be given in class.

## OVERVIEW OF COURSE REQUIREMENTS

Each student is required to give a short elevator speech and two, 15-minute oral presentations (one using PowerPoint; one without visual aids) focused on a wildlife biology or conservation topic. Each student will also be required to submit short (1-2 page) critiques of their own presentations after viewing them on video and to constructively critique the presentations of other students. A separate, detailed assignment sheet will be provided that sets forth expectations and provides guidance for preparing presentations. **Your presentation TOPIC and FOUR preferred presentation dates must be submitted to the instructor by email no later than September 19.** Attendance is mandatory, unless there is an exceptional circumstance and the absence is approved in advance by the instructor. There will be no final for those who have attended each class or received an instructor-approved absence. **Grading is CR/NCR.**

## SCHEDULE

August 29	Review syllabus and course requirements; Introduction to Effective Communication
September 5	Movies and Discussion: <i>How to Write &amp; Deliver Great Speeches</i> , Ross Shafer; <i>The Perfect Storm: Factors Influencing Conservation in the 21<sup>st</sup> Century</i> , Jim Martin.

Dec 5	Conclude Course and Course Evaluations

- The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and [Disability Services for Students](#) (DSS). If you think you may have a disability adversely affecting your academic performance, and you have not already registered with DSS, please contact DSS in Lommason 154 or 406.243.2243. I will work with you and DSS to provide an appropriate modification.
- All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University. All students need to be familiar with the Student Conduct Code. The Code is available for review online at [Student Conduct Code](#)

Dropping/Adding:

Drop/Add dates are posted at [Office of Registrar: Calendar](#).

Important Dates Regarding Opportunities to Drop a Course during Autumn 2019 Semester:

<b>Date</b>	<b>Description</b>	<b>Date Range</b>
To 15 <sup>th</sup> instructional day	Students can drop classes on Cyberbear with refund	August 26 to <b>September 16</b>
16 <sup>th</sup> to 45 <sup>th</sup> instructional day	Drop requires form with instructor and advisor signatures, and there is a \$10 fee; student will receive a 'W' on transcript and no refund.	September 17 to <b>October 28</b>
46 <sup>th</sup> to last instructional day	Students are only allowed to drop a class under very limited and unusual circumstances. Concern over course grade is not an acceptable reason. Requests to drop must be signed by the instructor, advisor, and Dean and a \$10 fee applies. A WP or WF will appear on the student's transcript.	October 29 to <b>December 6</b>
