

Wildlife Biology Graduate Seminar

Analysis of selected problems in wildlife biology and conservation

Spring 2023

Instructor: Dr. Hugh S. Robinson

The Wildlife Biology Graduate Seminar provides a venue for graduate students and faculty to share and learn about research going on within the program, as well as to hear from guest speakers outside of the program. The primary purpose of Graduate Seminar is the presentation of proposal and thesis seminars required of graduate students in the Wildlife Program. Secondly, it provides opportunities for Wildlife faculty and graduates students to interact through informal discussions, for graduate students to present and discuss their research outside of their defenses, and for invited guests to speak with students and faculty. Graduate Seminar is collaboratively managed by a faculty member and a representative of the graduate students to ensure the seminar series is responsive to graduate student interests. Each year, graduate students typically extend an invitation to a distinguished guest speaker.

Required Readings

- None

Class meeting times:

F 1:00 – 2:50 pm, Forestry 106

Tentative Schedule: Please see the Wildlife Biology website for changes and updated schedule (<https://www.umt.edu/wildlife-biology/seminar.php>)

Grading: Credit/no credit.
